

# Pencil Grip

1. Lay pencil on table with point pointing towards you.

With the thumb & index/pointer finger pinch the sharpened end of the pencil where the paint meets the wood.

2. Flip the pencil back to rest in the "webspace" (soft skin between thumb & index/pointer finger) in the ready position.

3. The pencil will rest on the middle finger.

Fingers 4 and 5 are tucked under.

This is the way a pencil should be held. It is the tripod grip.
